General information about Fabege's sustainability work

As a developer of sustainable urban districts, Fabege consider it important to take long-term corporate responsibility. Remaining at the forefront in terms of sustainability is mission-critical, partly because in the long run the company must be able to attract customers, employees, and investors. Green financing is a welcome component of these efforts. Fabege environmentally certifies all properties according to BREEAM. We work with the methodology CityLabAction in the development of sustainable neighborhoods. Fabege only buys electricity, heating and cooling that has been generated from renewable energy sources. Green leases for tenants are standards.

Some sustainable objectives

- Climate-neutral management (scope 1 and 2) in 2030
- Indirect emissions (scope 3) will be halved by 2030
- Breeam Environmental certifications of all properties
- 100 % Green leases
- Sustainability inspections of all Fabege's strategic suppliers
- 100 % Green funding by 2020
- Great Place to Work Confidence rating of at least 85 %

Please read more about Fabege's green financing online at www.fabege.se/en/investors/financing/green-financing/
